SUMMARY

Information Technology student with knowledge in networking and cybersecurity with skills in system monitoring threat analysis vulnerability assessment incident response and log analysis.

EDUCATION

King Abdulaziz University,

2023 –2027

4.69 / Bachelor of Information Technology

PROJECTS

Network Reconnaissance using Nmap,

02/2026

Network Reconnaissance using Nmap Conducted network scanning and service discovery on a vulnerable machine using Nmap identified open ports running services and their versions performed operating system detection and analyzed potential vulnerabilities and utilized the Nmap Scripting Engine NSE to detect misconfigurations and security weaknesses

ARP Poisoning & MITM Attack Analysis,

04/2026

Simulated a Man in the Middle MITM attack using ARP spoofing on Kali Linux and Metasploitable2 and analyzed intercepted traffic with Wireshark Observed ARP table manipulation and traffic redirection between network devices Restored normal network operation by stopping the attack clearing ARP cache and verifying IP to MAC mappings Applied mitigation techniques including Dynamic ARP Inspection DAI and static ARP configuration

SKILLS

❖ Technical Skills:

- | | |
|------------------------|----------------------------|
| . Security Monitoring | . Threat Analysis |
| . Network Fundamentals | . Incident Response |
| . Linux | . Python |
| . Log analysis. | . Vulnerability Assessment |
| . SQL | |

❖ Soft Skills:

- | | |
|-----------------------|-----------------------|
| . Problem Solving | . Analytical Thinking |
| . Attention to Detail | . Time Management |
| . Teamwork | . Fast learning |

COURSES

- **Cybersecurity Defense Analyst,** Cisco Networking Academy

2026

- **Data and Tools for Defense Analysts**, Cisco Networking Academy 2026
- **Cyber Kick Start Landscape**, Capsule Tahawul Initiative 2026
- **Bower Bi**, Satr Platform 2025
- **Introduction to Databases**, Satr Platform 2026

LANGUAGES

. Arabaic

. English
